## SEMI- PERMANENT MAKE UP AFTERCARE ADVICE

Resist the urge to scratch your skin whilst it is healing. It is natural for it to feel itchy during this process. Do not pick at any of the scabs that may form.

Avoid makeup and products in the area where you have had your permanent makeup done for the first week..

Be careful when washing your face for the first week: avoid scrubbing or interfering with the healing area. To cleanse you can gently use a wet cotton pad or similar to gently dab the area treated or splash with water/soap.

Keep your hands clean and avoid touching the affected area(s)

Avoid breaking a sweat for the first 48 hours after the treatment.

Do not enter swimming pools, jacuzzis, or other saunas for the first few days until the area is dry and healing.

Do not use Vaseline, Neosporin, or other petroleum-based products while healing. This can smother the area and delay the process.

Do not bleach, tint or dye the tattooed area for one month following the procedure

## WHAT TO EXPECT DURING THE HEALING PROCESS

Whether it's Powder Brows, Lip Blush or Eyeliner the healing process can be a difficult time if you don't know what to expect. To help ease you through the process we've detailed what you can expect below:

Day 1: Your new Permanent Makeup is looking beautiful immediately after your appointment. Some redness and swelling may be experienced.

Day 2: The pigment will possibly appear darker than it did yesterday and will continue to get a little darker throughout the day

Day 3-6: The treated area will begin to lightly scab over. The skin will feel tight, dry and itchy during this phase.

Day 7- 14: The scabbing will fall off. The area will look patchy at this stage. It is important to NOT pick or pull any scabs. **Pigment may be very light in colour and not as visible.**

Day 14-28: The skin will continue to heal, the pigment will gradually become more visible. It is normal if some areas are lighter than others. This is why we have the top up, so that we can reinforce any areas that didn't hold so well at your first appointment.

After 4-5 weeks you will be ready for your top up where we can perfect your new Powder Brows, Permanent Eyeliner, or Lip Blush
